ABOUT US Why Compact Canopy?

The Compact Canopy is truly a revolution in outdoor sheltering needs!

This new patent pending product is a unique Australian innovation that lets you do it all in an instant - providing a compact, easy to travel canopy and a stylish and affordable answer for any outdoor activity.

Fitting easily into any standard car boot/trunk, the Compact Canopy features a carry case with wheels for easy manoeuvrability and is made to the highest quality standards.

Simply unload the Compact Canopy, follow the simple instructions using its unique telescopic fold-up/ fold-down design and you have an instant 3m x 3m, heavy duty canopy shelter. Unlike any other, the Compact Canopy maintains its structural integrity through its fully supported, quality internal frame.

Pack down sizes for either the steel or aluminium frame is equally as impressive- from as small as 98cm x 28cm x 28cm packed.

Made to the highest standards the patent pending Compact Canopy is a lightweight model starting from as low as 15kg in its carry bag. It is 100% waterproof, seam sealed and with UV treatment for any condition.

It's a revolution for any outdoor enthusiast, designed to make life easier and even more enjoyable.

WALL KIT OPTIONS

WALL KIT (MSK3)

The wall kit options are fantastic as each wall can be zipped on or off to suit your best set-up. You can configure your wall kits as you like moving them around or simply leaving sections off entirely. Each kit contains 2 x 3m multi walls that have 3 different uses being 1/ solid (fully zipped down), 2/ mesh for air flow and viewing (window flap rolled up) or 3/ the additional PVC window accessory can be added to still allow viewing whilst blocking the wind out.

Using the same 300g polyester with PVC coating as the canopies, the wall kits are a strong durable addition to your Marquee for all occasions. Each kit comes with it's own carry bag and pegs for ease of transporting and set-up.

HALF WALL KITS (CCHW3)

Half Wall kits are ideal for a great effect for a market stall or corporate look. These can be used on all sides or just the one depending on your circumstances. These are available in all of the current colours and are simple to assemble and very effective.

ACCESSORIES

AWNING/VERANDA KITS (CCA3)

This is a fantastic addition to your marquee. Not only does it provide additional shade but allows people to huddle under your Gazebo on those wet days.

This great feature is a must for all stall holders, giving you a unique and attractive selling difference.

GUTTERS, SANDBAGS, STEEL WEIGHTS

Compact Canopy provide consumers with many accessory options to compliment their range.

There are gutters to join the frames together to make a 3m x 6m area waterproof or however large you need. Also if you have to set up on hard surfaces you either have the option of 15kg steel weights or sandbags that can handle up to 13kg each. Both weights are easily transported with oversized carry handles in the sandbags and raised handles in the steel weights.
